Knowledge check

1 minute

Choose the best response for each of the questions below. Then select "Check your answers".

Check your knowledge

1. What are the three types of authentication?

- Something you know, something you have, and something you are.

✓ Correct. Authentication can be divided into three types. These are something you know, something you have, and something you are.)

- Something you own, something you know, something you learn.
- Something you find, something you are, something you know.

2. What is credential stuffing?

- An attacker attempts to gain access using millions of username and password combinations.

- You use the same username and password at many sites. There's a security breach at one site, and attackers use your compromised usernames and passwords at many other sites.

- ✓ Correct. Credential stuffing is when attackers attempt compromised username and password combinations at many sites.
- A dictionary of commonly used words is used for the brute force attack.

3. What are the three principles of Zero Trust?

- Verify explicitly, assume breach, and use least privileged access.
 - ✓ Correct. The three principles of Zero Trust are verify explicitly, assume breach, and use least privileged access.
 - Spear-fishing, pretexting, and baiting.
 - Credential stuffing, key logging, spear-fishing.
