Knowledge check

2 minutes

Choose the best response for each of the questions below. Then select **Check your answers**.

Check your knowledge

1. Admins in the organization are using the Microsoft 365 Defender portal every day. They want to quickly get an understanding of the organization's current security posture. Which capability in the Microsoft 365 Defender portal will they use?

○ Reports.

◉ Secure Score.

✔ **That's correct. Secure Score, in the M365 Defender portal, will give a snapshot of an organization's security posture, and provide details on how to improve it.**

○ Policies.

2. Which of the following describes what an admin would need to select to view security cards grouped by risk, detection trends, configuration, and health, among others?

◉ Group by topic.

✔ **That's correct. Use this filter to view security cards grouped by risk, detection trends, configuration, and health,**

among others.

○ Group by risk.

○ Group by category.

3. An admin wants to get a comprehensive view of an attack including where it started, what tactics were used, and how far it has gone in the network. What can the admin use to view this type of information?

○ Alerts

○ Reports

◉ Incidents

✔ **That's correct. An incident is a collection of correlated alerts that make up the story of an attack.**
